MEMORANDUM

TO: Katy Walton
Caltrans

FROM: Brad Mettam, Yucca Mountain Project Coordinator 

DATE: November 9, 1995

SUBJECT: 1. Material from FHWA HAZMAT Routing Class; and
2. CHP HRCQ Radioactive Materials Routing Decision

1. One of the County representatives (from Esmeralda) attended a class on HAZMAT routing, and allowed me to copy the materials. I made a copy for you, including a disk containing the program they distributed.

2. I have made you a copy of the CHP Routing determination, as you requested.

Please give me a call if you have any questions.

Re: Yucca Mountain EIS Scoping

Attached is the Calif. map
handed out by DOE in Sacramento,
and the Transmittal explanation.

I don't think this takes into
account CHP's HM164 routes.
We should check.

Brad

Environmental Impact Statement For A Repository

At Yucca Mountain, Nevada

EXPLANATION OF UPDATE TO THE ENVIRONMENTAL IMPACT STATEMENT SCOPING PRESENTATION:

1. The graphic on the page of the Environmental Impact Statement Scoping Presentation titled "What is a Repository" has been changed. The graphic has been "flipped" to more accurately reflect the entrance to the tunnel network through the north portal pad. The original form of this graphic was used at the Tonopah scoping meeting because the updated version was not yet available. Following the Tonopah meeting, when the updated graphic was available, it was used for all subsequent scoping meetings. No other changes have been made to the presentation.
2. This updated package also includes copies of national transportation maps depicting potential national transportation routes for transport of spent nuclear fuel and high-level radioactive waste. These maps were distributed at the scoping meetings conducted in other states outside of Nevada as an addendum to the Environmental Impact Statement Scoping Presentation.
